

Tazewell County, IL

TazCom:

Most public safety communications is handled by the Tazewell/Pekin Consolidated Communications Center (Tazcom) in Pekin. Many operations are on a networked EDACS system on the below frequencies. The Mackinaw site is a SCAT site (Single channel) and as such is used as a control channel until voice is called for that site. Some sites might also be shared with Ragan Communications systems. The Ragan SMR is also used by many area public safety operations
